Another logistics complex should grow at the Middle Považie. Another logistics-administrative complex should grow in the cadastre of Hrádok village in the region of Nové Mesto nad Váhom, together with the advised projects near Trenčín. The area building-up requires almost 40 mills Euro according to submitted motion of Bratislava Company Datanetic, a.s. As results from the investment intention, 1 800 to 2000 people could find job in the area next to the D1 motorway.

6 to 7 halls should grow on the area of 190 thousand m² in the western part of the village cadastre, whereas storage spaces would exceed 60-thousand m² area and above 19-thousand m² area would be devoted for administrative purposes in the area. The part of the area should be almost 500 of parking places. The designer plans to store products from the area of building industry, electric engineering, light engineering, spare parts for cars, ceramics, textile, shoes, and office supplies at Hrádok. Presently the lands serve for agricultural purposes. Building would start already this year and the designer assumes its finish in year 2011.
