

# Nitra: hospitals will be reconstructed after attachments are signed

Author: SITA - Slovak News Agency | Published: 07.04.2009

Planned building modifications in the hospitals at Levice and Komárno have not begun yet. The Nitra self-administrating region (NSK) had conditioned them namely by signing attachments to the rental agreements on property protection of the region by gain less organizations, which administrate the hospitals. According to them the Region would return just the money, which the gainless organizations spend during the building modifications, in the event of termination the rental relation. As Peter Privalinec, the director in charge of NSK Office, informed, most of attachments have been signed; however, they are waiting for hospitals at Topolčany and Levice.

Hospitals want to finance reconstructions mainly from structural funds of EU and state budget. The hospitals at Topolčany, Šaľa, Komárno and outpatient clinic at Štúrovo belong to the Region. From the budget of the Region will go to health services by 30 percentages more finances in year 2009 compared with previous year.
