Already this year begins the construction of the sewage network at Nitra and its surrounding. The sewerage network is to be completed especially in outlying municipal districts, where so far lacked - in Krškany, Kynek, Dražovce, Párovské Háje, Janíkovce and Mlynárce. Západoslovenská vodárenská spoločnosť (Western-Slovakia Water Company), whose largest shareholder is the town of Nitra, submitted the project in October, under the Ministry of the Environment challenges. Money is already approved. „About ten millions Euro will enable the city to complete the sewerage network in all municipal districts,“ said the professional administrator for regional development Helena Rýchla from Nitra the Town Hall.
