Bratislava- Petržalka continues in the preparation of parking houses construction. "We have selected a supplier. We solve relationships to lands. Since they belong to the city, we have to rent them or obtain the consent of the owner to build a parking house, "said mayor of Petržalka Milan Ftáčnik. The construction could start next year. Parking houses could arise in Lachova Street (140 places), Švabinského Street (500), Jungmannova Street (220) and Holíčska Street (140); the latest proposal, however, was criticized by citizens.
