

A single company represented the CR at MAPIC

Author: ČTK / SF | Published: 30.11.2010

Czech development companies headed to the real estate fair MAPIC in Cannes, France, mostly as visitors without their own stands this year. The only domestic real estate company with its own stand at the fair was Mint Investments. Participation of Czech companies at the show focusing mainly on shopping centres reflects the low activity in the Czech retail property market. However, a recent survey by KPMG shows that the banking sector in the CR prefers commercial real estate. A total of 7,400 participants from 2,940 companies from 67 countries came to Cannes this year. The attendance rate at the fair increased by 10 % compared to last year.
