

Skanska sold a portion of R6 park to ILD

Author: SF / pb | Published: 29.11.2011

The company ILD bought a part of the R6 Logistics Park from Skanska, particularly a plot covering 20,800 sqm. The park is located northwest of Prague, in the village Jeneč, in close proximity to the R6 expressway and Prague Ruzyně International Airport. The logistics park is designed for light industry and stretches over an area of 400,000 sqm. Skanska's strategy is to sell the land for R6 Logistics Park with the aim to focus their efforts on building green LEED-certified office buildings. ILD is a Belgium-based property development company engaged in construction of logistics parks.
