

Property tax reduction for green building owners in Cluj-Napoca

Author: SF / zs | Published: 30.05.2012

The Cluj-Napoca City Council delivered a positive example to the nation being the first municipality in Romania to adopt specific measures for encouraging green building development. The City Council voted on May 24 to provide a 50% reduction in property taxes for buildings earning a green certification and achieving the top score on the energy efficiency rating.

This decision shall apply only to buildings that are certified by three certification systems recognized worldwide - LEED, BREEAM and DGNB.
