

About us

Stavební fórum is a communication platform created and operating by MSG holding. It is active in two areas most of all: its e-magazine Stavební fórum (www.stavebni-forum.cz) brings new information and articles from the world of development, architecture, construction and design every week, and also monitors the legislative and tax issues in these fields. Another, equally important part of Stavební fórum is the organization of specialized conferences and seminars with a focus corresponding to the content of the magazine. About fifty such events are held annually, mostly in Prague, but to a growing extent these events are occurring in the individual regions of the Czech Republic (a branch of Stavební fórum has been operating in Ostrava since April 2008). The activities of Stavební fórum have already crossed the borders of the Czech Republic, as its sister organization - Stavebné fórum - was established in Slovakia in 2006 (www.stavebne-forum.sk).

Editorial board

To ensure its maximum quality and close cooperation with the professional public, i.e. our readers, Stavební fórum has set up an editorial board. Its members are leading representatives of all areas associated with the domestic real estate market.
