Kupred, s.r.o. Company plans to build-up the logistic complex at price of approximately 33.2 mills Euro. In the cadastre of Opatovce village ought to grow up 6 logistics halls and two objects of services. Roughly 300 new jobs ought to rise after the commercial-logistics complex is built-up. The investor intends to start building the commercial-logistics centre in April this year, whereas beginning of operation is planned two years later.

The logistics complex ought to spread out on the area of almost 140 thousand m² according to the investment design. Useful floor space of halls ought to present above 35 thousand m² and useful space of objects of services approximately 4 thousand m². Logistics halls and objects of services ought to spread out on the area roughly 38 thousand m². The inventor intends to build-up also 480 of parking places in site. „The investor Kupred has the interest to build-up modern and flexible logistics complex in order to concentrate and offer services for clients in the area of logistics,“ the investment design states.
