The Trnava town is already looking for a company that would provide the construction of the urban industrial and technological park. The contractor shall provide the construction of the pavilions of sophisticated production, the production cells and the production-technological pavilion. The town assumes to spend for this purpose up to 8.6 mills Euro, whereas the project will be financed also thanks Euro funds. Trnava has already obtained a grant from the Slovak Agency for Investment and Trade Development (SARIO) amounting to 95% of eligible project costs, representing nearly 9.59 mills Euro. In the industrial and technological park, which wants to build the Trnava town within three years, should find a job about 450 highly skilled workers. It will be created in the so-called brown industrial zone on the area of about 7 500 m². They will reconstruct communications and engineering utilities and build 1 500 m² of parking spaces within the construction works. The construction should begin in the early summer.
