

Bratislava: Territorial proceedings on Predstaničné Square are interrupted

Author: SITA - Slovak News Agency | Published: 30.06.2009

Territorial proceedings on Predstaničného Square reconstruction in Bratislava are suspended after a month. This is because of several objections of parties to the proceedings, according to the agent of I.P.R. Slovakia, s.r.o. Igor Balla and Alena Kopřivová, the Old City spokeswoman. With the construction also agreed preservationists after modification of certain parts of the project. The investor originally proposed to demolish the Stock n°2 (a national cultural monument and a museum of transport). At the end authorities decided that just the building of yellow colour between the seat of police and the Stock n°1 will be decontaminated. Preservationists positively evaluate the project; it will improve the whole area according to them.
