

# Because of PPP projects the law on public procurement should be changed

Author: SITA - Slovak News Agency | Published: 30.06.2009

Banks as potential participants in the consortium will involve in PPP projects only when the time limit elapse allowing the proposal application to determine invalidity of a concession contract to a court according to Transport Minister Ľ. Vážny. It should be shortened from 1 year to 30 days. It appears from the draft amendment on the Public Procurement Act, approved by the Government. As the Minister said the year period allowing a contest of a concession contract would significantly delay PPP projects. Such legislation amendment is normal in EU countries according to him. As he added, in Ireland and Denmark is the 10-day period and in France, Great Britain and Belgium 14-day one.
