

The Department of Construction propose new measures against the crisis

Author: SITA - Slovak News Agency | Published: 28.07.2009

Ministry of Construction and Regional Development has developed the draft for short and medium term measures to the scrutiny process to eliminate negative impacts of the economic crisis on the building industry. Four of them are focused on maximum utilization of funds approved in the state budget for 2009 for implementation of construction investments and promotion of housing development as well as for promotion of vocational education development and application of new innovative measures of the energy efficiency of buildings.
