In Slovakia there was completed approximately 33 thousand m2 of modern warehouse spaces in the 3rd quarter of 2009 as compared to the 2nd quarter is a positive development. It is clear from the study by Cushman & Wakefield; in the semi-year comparison, however, construction slowed down markedly. In the first 3 quarters of 2008 was added more than 222 thousand m2 of industrial space as compared with 3 this-year's quarters is about 72% more. „This fall creates the desire to complete renting the existing spaces,“ said Martin Baláž from the Slovak Department of industrial space rental, Cushman & Wakefield
